EAZA Conservation Database Snapshot – October 2017

Southern African Foundation for the Conservation of Coastal Birds

Supported since	2000
By EAZA member	Artis Zoo
EAZA Conservation Category	Conservation education and Capacity building, Species and Populations
Habitat	Marine Coastal, Marine Intertidal

ARTIS coordinates the African penguin EEP and has been supporting the Southern African Foundation for the Conservation of Coastal Birds (SANCCOB) with their educational projects which consist of lessons, arts-and-crafts and storytelling about seabirds and the marine environment. SANCCOB has treated nearly 100 000 seabirds since 1968 and through the Chick Bolstering Project (CBP), SANCCOB and its project partners rescue ill, injured and abandoned African penguin chicks and rehabilitate the birds. The project is recognized globally as one of the most successful conservation initiatives to reverse the decline of the endangered species.
