

Zoo Magdeburg currently maintains more than 800 animals of 184 species on a 26 hectare park. The zoo is characterised by its interesting animal population and the zoological concept based on the EAZA statutes. As part of the new concept, animal stocking and enclosure design are being rethought. In addition to ongoing modernisation, our continuous development is also characterised by major projects. With an annual number of 320,000 visitors, Magdeburg Zoo is one of the most popular tourist and cultural institutions in Saxony-Anhalt.

We see the task of our zoo education in providing visitors with access to animals and nature, conveying knowledge and understanding of biodiversity and species protection and raising awareness of environmental protection. Zoo Magdeburg is therefore looking for a future-oriented educator or biologist who can turn education into a zoo experience
